Light brightness

Volume down

Volume up

Power button: Press  once to turn on aroma mist and color-changing light. Press again to turn the light off. Press a third time to turn the mist off.

1. Remove outer cover from the base. Next, remove the inner cover.
2. Pour water into the reservoir, ensuring you do not fill above the max line. Then add 5–7 drops of essential oil to the water. For optimal mist delivery, we recommend filling this unit with 160 ml of water (using the measuring cup provided).
3. Put the inner and outer covers back on.
4. Plug the adapter into the diffuser, then plug the adapter into an outlet.
5. Choose your aroma mist, light, and sound options.

Aroma mist: Your diffuser has 2 mist options. Press  once for continuous mist, which will run for up to 10 hours. Press again for intermittent mist (30 seconds on, 30 seconds off), which will run for up to 20 hours. Press a third time to turn the mist off. When your diffuser runs out of water, it will automatically shut off.

Color-changing light: Press  once to turn on the color-changing light. Press again to stop on a preferred color. Press a third time to turn the light off.

Light brightness: While the light is on, press  once for bright light. Press again for medium light. Press a third time for low light.

Music: Press  once to play the first track. Press again to switch to the next track. Press and hold to turn the music off.

To clean: Wipe reservoir with a damp, soft cloth every 2 weeks. See the full user guide online for more details.
